

Genomic tracks showing read coverage for various samples across a 4173 bp region. The tracks are color-coded: yellow for C1, C2, C3; blue for D1, D2, D3; green for DF1, DF2, DF3; and orange for F1, F2, F3. The x-axis shows genomic coordinates from 1,720,532 to 1,723,312. Two gene models are shown at the top: KS17gene_2899a (1,720,532-1,721,922) and Tb927.10.6830 (1,721,922-1,722,617). The y-axis for each track ranges from 0 to 1087.0.
